

Fashion & Textiles: Innovation in Sustainability

LCB Depot's exhibition & events programme highlights work from a different creative industry every month. In April 2020 the focus is on fashion and textiles.

Artists and designers from across the country including those based in Leicester and at De Montfort University will explore sustainable practices from bespoke tailoring of long lasting garments to innovative new materials.

Ethical Future

Mollie Puzey

2 piece knit set: Responsibly sourced Polo Merino wool, Coat: 44% wool, 31% recycled polyester, 25% viscose

"Ethical Future," for Zara works towards making a better future for the fashion industry. The A/W 20/21 collection has a neutral and minimalistic feel. Combining high fashion with wardrobe staples helps to slow down the pace of the Fashion Industry, creating clothes that can be re-worn in different combinations to create various looks. Ethically sourced and ethically made fabrics are used to enhance the collection.

Artist Bio

Since starting my Fashion Buying with Design course at De Montfort University, I have had the chance to work on briefs collaborating with brands from Next to Stella McCartney. I completed a 15 month placement at Roy Lowe and Sons where I was able to work closely with brands in creating my designs to see them launch in store and online. Being able to create designs with ethical and sustainable practice in mind is key for my future in the industry.
